

Stat 201 - Generalized Linear Models**Optional Assignment**

1. Review the R codes presented during this week (look in the directory **R material**).
2. Import the dataset `carinsurance.dat` from the course web site. Answer to the questions of Exercise 9.2.
3. Load the data `housing` from the `dobson` library and answer items a) and b) of exercise 9.5. Compare the results with those obtained by using a nominal logistic model (see ex 2 of OA6)
